Hi Josh - thanks again on the helpful conversation on where the Riparian Rule applies and other things we talked about on the Rule. I know we'll be talking more really soon.

This is where we heard that DEQ and ODF would apply the Riparian Rule, and we want to make sure we have a clear understanding of how DEQ and ODF are proceeding:

- 1) Wherever threatened and endangered (T&E) species exist or could exist based on ODFW distribution maps;
- 2) Additional areas where T&E species exist up to a natural barrier if such areas were excluded from the original ODFW maps;
- 3) Additional areas upstream of where T&E species exist or have existed, such that riparian cuts upstream of these areas will not result in more than a 0.3C cumulative impact downstream where T&E species are present;
- 4) Rules will also apply to where there is critical habitat.

Please edit or clarify the above where needed. Do they have plans to write down their methods or otherwise capture them? It sounds like they are creating maps to discuss with the public. Is that the case?

Thanks, Josh! I have to take off now, but I'll probably give you a call early next week (or Alan will). - Jenny
